IR DETECTOR MINI

The Luminescence Sun Chemical Security IR Mini Detector is designed to view IR visible (absorbing) and IR invisible (transparent) inks printed on to Currency, passports, ID cards, tax stamps and other high-security documents.

Please see further information below:

- Output Frequency: UV 365nm, Long wave UV (UV-A)
- Dimensions: 130mm x 82mm x 15mm
- Power: DC5V – Rechargeable
- Guarantee: Readers should be checked on receipt and returned to Luminescence SCS if not operating properly. Defective readers will be replaced at no charge. Once the reader is tested and approved by the customer there is no further warranty on the reader during use.
- Usage Guidelines: By turning on the device, the screen will turn on automatically. By holding the detector over the Banknote, Passport page, ID card or other secure document, this will show if the ink printed is IR visible (absorbing) or IR invisible (transparent).

For more information contact Luminescence Sun Chemical Security, where our advance technology team will be happy to assist you.
