QFX READER 1019

The Luminescence Sun Chemical Security QFX Reader 1019 is a compact device to check UV fluorescent inks at four different wavelengths. To ensure durability it is constructed in a shockproof plastic body. Thanks to the 10x magnification these devices are ideal for close inspection of all types of security documents, either in the laboratory or by inspectors in the field.

Please see further information below:

- ▮ Light Sources: White Light, UV Fluorescing 254nm, 313nm, 365nm and IR 980nm
- ▮ Magnification: X10 magnification
- ▮ Power: 2 x AAA batteries to be replaced when necessary
- ▮ Dimensions: (length x width x height), mm — 96x53x58
- ▮ Guarantee: Readers should be checked on receipt and returned to Luminescence SCS if not operating properly. Defective readers will be replaced at no charge. Once the reader is tested and approved by the customer there is no further warranty on the reader during use.
- ▮ Usage Guidelines: The illumination modes are easily switched using the control elements on the side panel of the device. With easily adjustable 10X magnification to adjust the focus.

For more information contact Luminescence Sun Chemical Security, where our advance technology team will be happy to assist you.
